# ABOUT

Established in 2017 by two avid golfers disgruntled with the carts currently available on the market. They wanted a cart that would change the way we think about golf carts. A cart that would be different, a cart that had style, a cart that wasn't the same as what everyone else was driving, they wanted a Drake. That's where it all began...

Drake Golf Carts is a family run business and prestigious golf cart dealership, which takes pride in a personalised customer experience and a market leading golf cart. Each golf cart has it's own unique chassis number, and is hand assembled by a small yet passionate team of craftsmen. Each cart, once assembled undergoes thorough quality control checks & rigorous testing to ensure the finest quality & results for our small yet loyal customer base. If looking to buy a golf cart, look no further, our carts offer everything you'd expect from a golf cart and more!

We use robust and reliable parts & components to match international standards with parts & components both imported from the USA, UK, Canada & China and locally assembled. This is how we can back our carts with the an unmatched 3 year limited warranty.

# MODELS

## LUXURY SERIES

The LX Series golf cart's features are bold and defined, making it hard not to look at. It is our flagship series with the most customisable options.

LX.827

LX.617

## COMMERCIAL SERIES

The CX Series was designed with the finest attention to detail. The round curves accentuate the flow in design. Our hardest working & comfortable drive yet.

DITCH THE HEAVY LEAD ACID BATTERIES.

# SWITCH TO LITHIUM LIFE PO4

**SUPERIOR** PERFORMANCE

**10X** LONGER LIFESPAN

**3X** FASTER CHARGING

**ZERO** MAINTENANCE

*We've pioneered the transition from lead-acid to advanced Lithium LiFePO4 technology—setting a new industry standard for cleaner, more efficient, and longer-lasting energy solutions.*

*We didn't just upgrade—we redefined the power standard. At 50–60% lighter than lead-acid batteries, you gain long-term value at the core of every drive with the benefit of an Integrated Battery Management System (BMS) that prevents overcharging, over-discharging, overheating, and short circuits.*
