The LX.2 will change the way you think about golf carts. Combining curvy and edgy in just the right way, turning heads at every corner. We've designed the drivetrain with AC drive technology, which keeps the cart responsive regardless of slope or the speed of the cart, allowing for a smoother drive experience. The suspension has been custom designed for the LX.2 model in particular, resulting in better handling and a more

comfortable drive of all the models in the LX range. Regenerative braking puts juice back into the batteries whilst braking. The XRT increases the battery's storage capacity, providing you with more range per charge. The LX.2 is a golf companion you'll never want to be without.
